

# Customer Code Conversion Utility

## Objective

To provide a means for companies to successfully change their customer account codes without losing current transactions, historical data or jeopardizing data integrity.

## The Value of the Customer Code Conversion Utility

- Change a single code, a list of codes or a batch using an import table
- Optionally retain original customer name
- All Accounts Receivable information is converted
- Sales Analysis and Quotation information is converted
- All sales orders are converted – current and historical
- Purchase orders and Work orders linked to customers are updated

## Matching the Customer Code Conversion Utility to Your Business

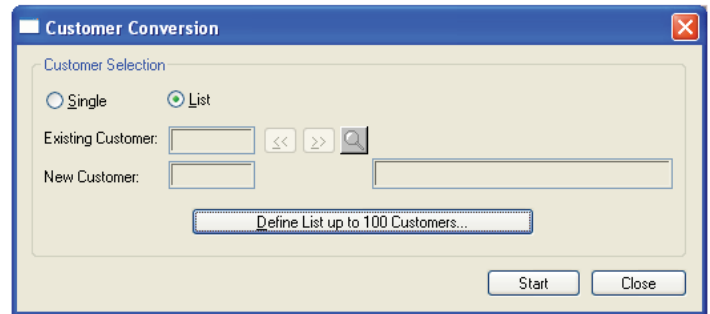

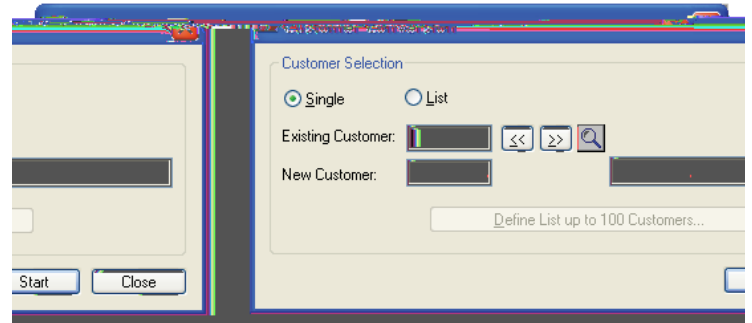

- Easily change customer account codes to match company growth requirements
- Retain all existing and historical data against each customer
- Control access to the conversion utility via SYSPRO security

## Integration

- Available from SYSPRO Issue 008 to current versions

## Audit trails and Reporting

- Produces audit trail of changes

## Disclaimer:

SYSPRO is not responsible for duplication of information that may result due to the re-use of purged codes that still exist in historical files.
