

## SYSPRO CyberScan

To provide an integrated data collection solution for all inventory, warehouse management, sales, purchasing and Work-in-Progress transactions, thereby reducing data entry time, increasing operational accuracy and eliminating the need to perform post-processing paperwork.

### The Value of SYSPRO CyberScan

- Real-time transaction processing improves inventory accuracy
- Support JIT for Work-in-Progress or sales with immediate receiving
- Ensure on-time deliveries with efficient picking process
- Enhance customer service with real-time information
- Reduce paperwork in manufacturing and distribution
- Real-time validation reduces administration and increases efficiency
- Efficient management of finished goods and raw material inventory
- Simplify data capture and improve visibility

### Matching SYSPRO to Your Business

- Streamline processing by setting system defaults and switching off unnecessary prompts
- Validate bin locations
- Support for full goods-in-transit facility
- Manage serialized and lot traceable items
- Optional two-stage sales order picking (pick and confirm)
- Option to link alternate barcodes to inventory items
- Define menus by User or Group

### Integration

Integrates with Inventory, Sales Orders, Purchase Orders, Work-in-Progress and Lot Traceability modules

The current application includes:

- Warehouse Transfers (in, out and immediate)
- Bin Transfers
- Purchase Order Receipts
- Sales Order Picking
- Physical Inventory and Cycle Counting
- Work-in-Progress Labor Posting
- Work-in-Progress Issues (Kit and Specific)
- Work-in-Progress Job Receipts

### Audit Trails and Reporting

- Standard audit trails of all transactions
