

FormTrap for SYSPRO

Objective

To enable organizations to create, format and deliver complex customized business documents instantly on an as needed basis directly out of SYSPRO.

The Value of FormTrap for SYSPRO

- Replaces the need for preprinted forms, their management and warehousing
- Creates any number of user-defined forms
- Delivers laser-quality invoices, purchase orders, reports, checks, forms and other business documents directly to a laser printer, fax output or e-mail system
- Form creation requires little training
- Ends difficulties with form loading, separating and splitting
- Provides the use of frames, images and other graphic elements to create easily updatable business documents
- Allows the data elements from your SYSPRO system to be included on forms
- Allows automatic faxing or e-mailing of forms directly from the application
- Multi-part forms can be created with specified data on each page and the pertinent page delivered to a specific printer location
- Customize documents to the needs of customers on the fly

Matching SYSPRO to Your Business

- Existing data files are automatically captured from a source application and merged into the forms assigned fields
- Forms are designed and formatted with commonly used text editing functions
- All forms are loaded on the host server, eliminating the need for a dedicated form server
- Provides easy form creation in an intuitive desktop publishing environment
- Easily switches between the new delivery and existing printing methods
- Fully scalable and can grow with the changing needs of an organization
- Changes are easily and instantaneously updated without interruption to the host system
- Allows different departments to customize business documents with signature blocks and specialized messages
- Comprehensive data conversion capabilities transform information such as part numbers, serial numbers and dates to barcode and MICR images

Integration

- FormTrap runs on Microsoft Windows 95, 98, 2000, NT, UNIX (SUN Solaris, HP-UX, IBM AIX, LINUX, SCO Open Server 5, SCO Unixware 7, DG/UX)
- The following output support: HP and compatible laser printers (PCL); Fax: VSI-Fax (UNIX and Windows) and MAPI (Windows 95, 98, 2000, and NT); E-mail: Send mail (UNIX) and MAPI (Windows 95, 98, 2000, and NT); plus an open interface for the user's fax or other post-formatting processes

Templates

FormTrap comes with templates for the following SYSPRO documents and reports:

- Invoices
- Delivery Notes
- Acknowledgement Slips
- Purchase Orders
- Factory Documents
- Credit Notes
- Accounts Receivable Statements
- Any SYSPRO report can be mapped using FormTrap to suit requirements, i.e. an Accounts Receivable Trial Balance report.
